Welcome to

Claude Impact Lab: Affordable Housing

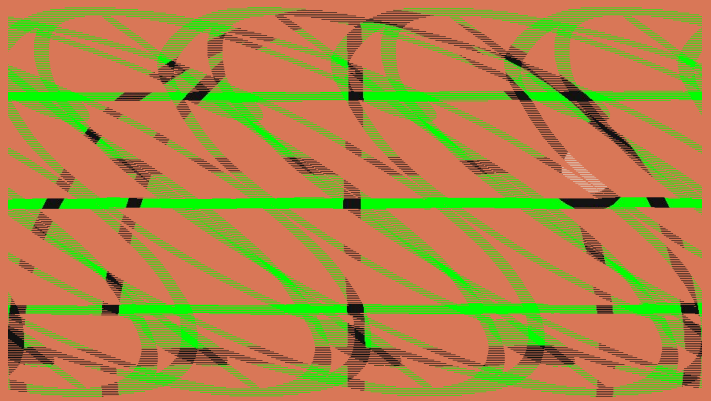

Saturday, Nov 7, 2026 · UCI Paul Merage School of Business

CLAUDE COMMUNITY

Claude Impact Lab · Los Angeles 2026

Hello, Irvine!

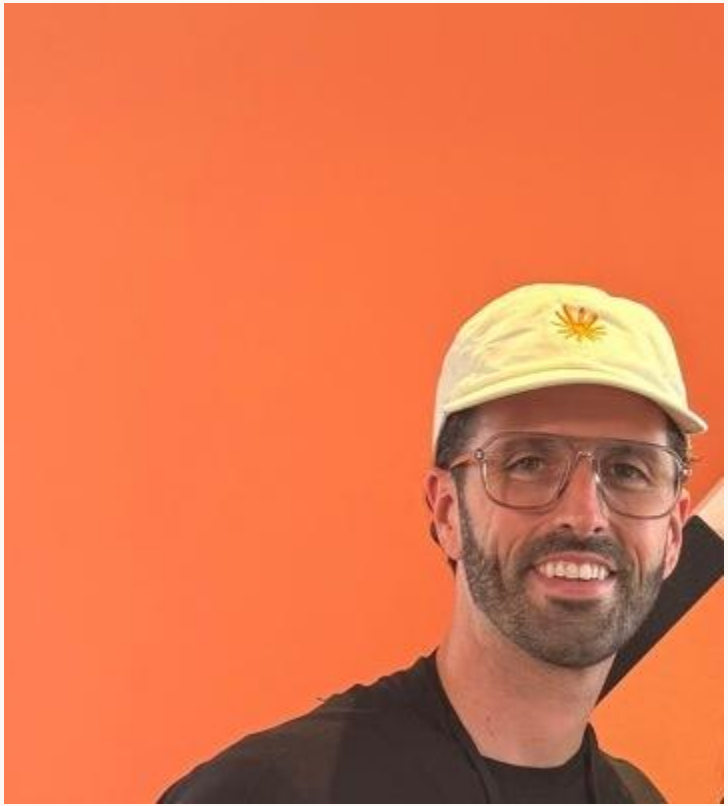

YOUR HOST TODAY

Hi, I'm Travis

Claude Community Ambassador, Orange County

10+ years	Started in tech in CPG e-commerce, a top 1% Shopify store. Then a career in product.
4 years ago	Joined SDx in San Diego: AI engineers, white-paper talks, hackathons. The product guy who felt out of place.
Then	Vibe coding arrived. The PM became a builder.
Now	We're all builders now. My north star: a 10,000-person hackathon. Agentic Olympics? Who knows.

Why Irvine? My wife is a physician at UCI. That's what brought us here three years ago.

Why we're here

In Orange County, a median home costs about $1.47 million.

Teachers, nurses, firefighters and the kids who grew up here have two choices: leave, or commute an hour or more each way.

Today, we build for them.

CLAUDE COMMUNITY

15%

of Orange County households can afford the median home.

C.A.R., Q3 2026

Oh, one more thing.

SPECIAL GUEST FROM ANTHROPIC

Keith Mancuso

Technical Enablement, Anthropic

From idea to prototype with Claude

Plus a few extra tips for today.

9:15 to 9:45 AM · then challenges and team formation

9:45 · BACK TO IT

All right, here we go.

Challenge statements, then teams. In your room and building by 10:00.

1

The challenges

Three lanes: Find it, Clear it, Fund it.

2

Pick a lane

One real user, and their before and after.

3

Form your team

Up to 5. Mix a builder, an idea person, a communicator and an organizer.

4

Register and go

Register your team on the hub, then head to your room.

Every home has to hit $0

In Orange County, the cost side usually wins by six figures per home. Most solutions are small, one-off projects. Scale is missing. Is it attainable?

$1.47M
median home price in OC

~4 yrs
from finding land to handing over keys

34
cities, each with its own forms and fees

30–35%
of income: what a family can pay for housing

THE $0 EQUATION

What the family can pay + public subsidies + fundraising − the cost to create the home = $0

Lanes 1 and 2 shrink the cost. Lane 3 closes the gap.

Three lanes. Pick one.

Teams of up to 5. Each lane is a problem, not an answer. The answer is yours.

01

Find it

Where can the next affordable home go?

02

Clear it

How do we turn four years into two?

03

Fund it

Does it pencil, and who closes the gap?

1. Find it

Where can the next affordable home go?

Who's stuck A nonprofit acquisitions lead with no GIS team, a congregation sitting on an underused lot, or city housing staff.

Today Sites are found mostly by luck: a city calls about surplus land, or a church offers its parking lot. New state laws open land that used to be off-limits (SB 9, SB 684/1123, AB 2011, SB 4), but nobody has connected them to the parcel data in a way a small nonprofit can use.

The question The laws are public. The parcel data is public. So why does finding a site still come down to luck?

34

cities in Orange County, each with its own parcel maps and zoning rules.

1. Find it: the brief

Starter data: places to start

SCAG parcel and Housing Element site-inventory maps · OC and city open-data GIS parcels · HCD Statewide Surplus Land Inventory · bill text at leginfo.legislature.ca.gov.

The rule

Cite the law and the dataset behind every site you flag. Don't scrape hard enough to get a city site to block us.

2. Clear it

How do we turn four years into two?

Who's stuck A nonprofit project manager, a small builder, a homeowner adding an ADU, or a city permit tech who wants to get it right.

Today The fast path exists: land that's already zoned, a ministerial approval (meet the written rules and the city must say yes) and state-approved plans. But each of OC's 34 cities has its own forms, fees and checklists, and the state regularly tells cities they've misread the law.

The question The fast path exists on paper. What would make it the normal path instead of the rare one?

4 → 2

years from land to keys, if the fast path becomes the normal path.

2. Clear it: the brief

Starter data: places to start

HCD SB 9 fact sheet · city ADU checklists and fee schedules (public PDFs) · HCD Housing Accountability Unit letters to cities · RHNA progress data on data.ca.gov.

The rule

Cite the statute or city rule behind every step. Where a city form and state law disagree, show both.

3. Fund it

Does it pencil, and who closes the gap?

Who's stuck A nonprofit finance lead, a development director, a donor, or a city housing analyst.

Today A family's price is capped by income, so it can't rise to cover cost. The gap gets filled from many sources: city, state and federal programs (CalHome, HOME, local housing funds), down-payment help, lenders, employers, donors and earned revenue. Today that stack is assembled by hand, one project at a time.

The question Every project has a gap. What makes it smaller, or makes the money that closes it easier to find?

30–35%

of income is the most a family should pay, so the price can't rise to cover the cost.

3. Fund it: the brief

Starter data: places to start

HCD 2026 income limits for Orange County (June 23 revision) · Freddie Mac mortgage rates · CalHome and CalHFA down-payment programs · any public OC listing of 4–12 homes as a test case.

The rule

Label every assumed number. If you made it up, say so.

THE JUDGES

Meet your judges

They watch every 30-second video, pick 10 finalists and score each live demo.

Ed Coulson

Director, UCI Center for Real Estate

Michael Imerman

FinTech professor
UCI Paul Merage School

Noah Samuels

Director, Design & Development

Jason Bigman

Community, Anthropic

Travis Johnson

Claude Community Ambassador

How winners are picked

At 2:30, judges watch every video and pick 10 finalists, then score each live demo in four areas.

01

Impact

A nonprofit or city would use it next month to help get homes built.

02

Works

Live demo on real data, sources shown. Rough and working beats polished.

03

Scale

A believable path to the next 100 projects.

04

Innovation

A new way to see or solve the problem. Bend the brief if it serves the goal.

Submit by 2:30

One per team. Any teammate can update it with their email.

1 **Public GitHub repo + README**

Open-source license. No API keys, no private data.

2 **30-second Claude video**

Made with Claude. Judges use it to pick the finalists.

3 **Submission form**

Scan the code on the right.

4 **Be ready to demo**

Finalists present live in the auditorium from 3:00.

Submission form

Breakout rooms

Eric Li Classroom 1128 · 1st floor
Judy Rosener Room 2321 · 2nd floor
Porter Room 5200 · 5th floor

Team formation time

Find your team.

Register on the hub. Pick a room. Go.

A good team mixes

Builder

Idea person

Communicator

Organizer

No team, idea or coding experience needed.

Your first steps

1 **Open the hub**

Register your team, then pick a room.

2 **Pick a lane and one real user**

Who's stuck, and their before and after.

3 **Ask a mentor, then build**

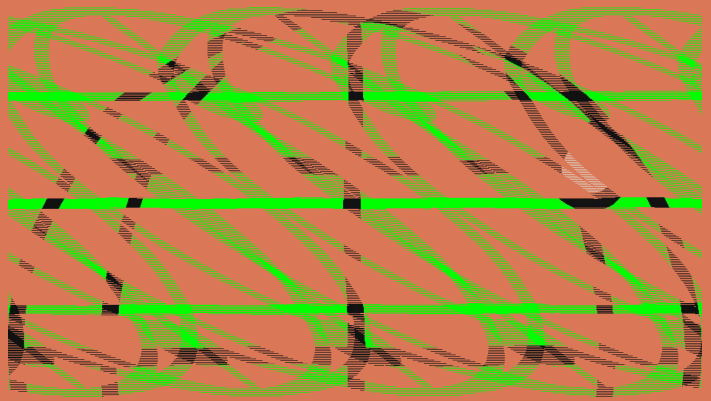

Mentors and floaters rotate through every room.

Challenges, data and rules

claudesocal.com/uci-impact-lab

Go build something that helps.

Submissions are due at 2:30 PM.

Repo, 30-second Claude video and the submission form. The code is on the Submit slide.
